Debbi:
Please place this email message in the administrative record for 200-ZP-1 and 200-ZP-2 ERA. If you have any questions, please let me know.
Thanks,

Arlene Tortoso

Weststates Carbon is acceptable for this waste provided it is shipped within the next month.

If you are going to continue with this facility please notify me next month and I will follow up with a new notice of acceptability.

Dennis

Arlene,
The following people (see message below from Nancy Weston) are who FH traditionally has contacted as EPA regional administrators to confirm CERCLA offsite determinations (just to confirm after the original offsite determination is received from EPA project managers) before sending off waste or materials to be reused after a treatment. From the FH perspective they are doing a second check to protect themselves. There is not a State administrator required for an offsite determination using 40 CFR 300.440, the offsite determination is strictly a EPA action.

Thank You,

Chris

090327

Chris,

In the past we have contacted the following people at EPA:

Kandice Bellamy - 1-415-744-2091 and Kathy Stewer - 1-415-744-1316.

Since it has been so long since we have shipped, these contacts may have changed but they would be able to give you new names and numbers.

If you need more information, please let me know.

Nancy Weston

Importance: High

Chris:

Dennis felt that he should be the one to contact the EPA and State administrators in order to make the determination. He requested the name and phone numbers of these contacts. Could you send that information and I will pass it on?
Thanks,

Arlene Tortoso

Subject: Request for an "offsite determination" for 200-ZP-1/ERA granulated activated carbon going off for "regeneration"

Arlene,

I would like to request forwarding of this e:mail Dennis Faulk requesting approval per 40 CFR 300.440 to perform regeneration of granulated activated carbon (GAC) from the 200-ZP-1/200-PW-1 (200-ZP-2) Expedited Response Action at the following facility:

Westates Carbon - Arizona, Inc
2523 Mutahar Street
Parker, AZ 85344-4005

EPA ID #AZD982441263.

These shipments are made through Fluor Hanford Waste Management Services as the Hanford site-provider for the shipping of waste offsite. Per Nancy Weston at Fluor Hanford they will contact the EPA regional administrator to confirm that this facility is still eligible to treat GAC from a CERCLA action and dispose of waste associated with the regeneration of the GAC, before each shipment would be made.

Thank You
Chris Kemp
